

LOLLIPOP 3 INSTRUCTIONS

Begin with the correctly completed version of Lollipop #2.

Watch the Week 4 classroom lectures and complete this assignment along with the lectures. I will be directing you to comment out some things and will be looking for those items in your code. I will take deductions if I do not find the items we commented out and left in our code.

There are some additional styles in these instructions so follow them carefully. *You must use all styles in the instructions and those covered in the lecture. (No student design changes!)*

Remember the styles apply to ALL pages. Make sure you have made the same changes on all pages!

NEW IMAGES

Download and add the 4 new images to your images folder.

Inside the main container:

- Place an h2 tag with the name of the page.
- Under the h2 tag place three paragraph tags so there is space between the h2 and the footer

BODY

- Use “fabric-pattern.png” to add a background image on the body
- Keep your body background color as a fallback in case a user has images turned off.

DIV (page container)

- Add 40px top margin (your page should remain centered)

NAV

- Put all of your links inside of an unordered list, leave your non-breaking spaces & | outside of the list items
- Add a linear-gradient using the colors e22121 & ed7878

NAV UL

- turn off margin and padding
- turn off the bullets
- Give the ul a width of 70% (This is not in the video. *It is an additional step.*)
- Center the ul using margin (This is not in the video. *It is an additional step.*)

NAV LIST ITEMS

- Display them inline-block
- Padding 0.5em top and bottom, 0.5em right and left
- Add a background hover color of ed7878 to all list items

NAV a TAG STYLES

a:link color white, no underline

a:visited: color white

a:hover color black **turn on the underline**

a:active color gray

HOME PAGE HTML CHANGES

Inside of the Main and after the h2 put your paragraph and the sucker.jpg image inside a section with a class of specials (*The image will end up commented out as you will see in the lecture, but leave it there.*)

HOME PAGE CSS CHANGES

Specials section:

- Minimum height 225px
- padding 20px;
- Add “sucker.jpg” as a background image on the left side of the container

Specials section paragraph:

- Width 675px
- Left margin 255px

PRODUCTS PAGE HTML CHANGES

- Inside of the main and after the h2 add a section with a class of products
- Inside of the products section place three figure elements that contain a figcaption inside
- Inside of the figure containers place one of the three new images
- Inside of the figcaption put the text **Product Name** (*don't forget the capitalization*)

PRODUCTS PAGE CSS

- section.products: 20px padding; margin left 45px
- figure:
 - display inline-block
 - 30px right margin all others 0 margin

LOLLIPOP 3 INSTRUCTIONS

- Box shadow using rgba 0,0,0, .05
- Border 3px red
- Border radius 50%

(You may change the border radius back to the 15% rounded corners if you prefer. One of the other will be acceptable, however the other should be commented out in your code).

- Figcaption: center text, change font to bold and add 20px of bottom padding

VALIDATE ALL YOU HTML PAGES AND YOUR CSS PAGE AND CORRECT ANY ERRORS.

ZIP YOUR WORK AND UPLOAD TO CANVIS.

Validation links are the same as you have already been provided in Canvas. However, I am posting them again below.

HTML Validator: <https://validator.w3.org/>

CSS Validator: <https://jigsaw.w3.org/css-validator/>
