

Maryann loves yard sales and can never pass up a good bargain. So, when she noticed four yard sales advertised in her local paper, she was more than ready to shop, and invited a different friend (including Eve) to accompany her on each excursion. Each sale took place on a different day (from Wednesday through Saturday), and Maryann left each with a different item. From the following clues, can you match the day of each sale with the friend who went along and the item Maryann purchased?

	Dolores	Eve	Theresa	Wendy	Camera	Filing cabinet	Record player	Typewriter
Wednesday								
Thursday								
Friday								
Saturday								
Camera								
Filing cabinet								
Record player								
Typewriter								

1. Wendy did not accompany Maryann when she bought either the typewriter or the record player.
2. Dolores wasn't with Maryann when she purchased the record player (which wasn't on Wednesday).
3. The camera was purchased at some point after the filing cabinet, which was purchased at some point after the record player.
4. Theresa's trip was at some point after Wendy's.

LIQUID REFRESHMENTS BY JANET FLEMING

Five friends stopped at the corner store for some bottled water. Each chose a different size bottle (half-pint, pint, quart, half-gallon, or gallon) of a different brand (including Victoria Falls). Can you identify each person's purchase?

	Half-pint	Pint	Quart	Half-gallon	Gallon	Covered	Ever-On	Peria	Rusty	Victoria
Alistair										
Cosmo										
Gwen										
Sabrina										
Teddy										
Covered										
Ever-On										
Peria										
Rusty										
Victoria										

1. Neither Teddy nor Sabrina likes Rusty Wells water.
2. Gwen bought the pint bottle.
3. The five purchases are the half-gallon bottle, the gallon bottle, the bottle of Covered Wagon water, Alistair's, and Sabrina's.
4. The gallon bottle is neither Ever-On (which isn't the brand Sabrina selected) nor the one Cosmo chose.
5. Alistair asked one of his friends if he could have a sip from his or her quart bottle (which didn't contain Peria water).

Note: A statement such as "The gallon bottle is neither Ever-On...nor the one Cosmo chose" means that the gallon bottle isn't Ever-On, that the gallon bottle isn't the one Cosmo chose, **and** that Ever-On isn't the one Cosmo chose.
